## 1. Overview

This Change is required to improve the quality and accuracy of the Build Pack documentation for the WA Electricity Market.

### 1.1. Current State

The WA electricity market uses Build Pack (revision 2.0) as the basis for establishing electronic communication between the network operator and code participants under the Customer Transfer Code Communication Rules and Electricity Industry Metering Code Communication Rules.

The Build Pack defines the processes, procedures and methods used to communicate between the network operator and code participants.

The Build Pack has been developed by consultative process between code participants and is published at:

[http://www.westernpower.com.au/mainContent/workingWithPower/NetworkAccessServices/MeteringTransferCodes/Build\\_Pack.html](http://www.westernpower.com.au/mainContent/workingWithPower/NetworkAccessServices/MeteringTransferCodes/Build_Pack.html)

### 1.2. Reason for Change

While using the Build Pack, code participants have found the documentation to be lacking in detail and clarity, and to contain errors.

### 1.3. Proposed Change

Revise *Electricity Market Build Pack* documentation to revision 2.1.

Notes:

1. As a result of this documentation revision, the document structure is more closely aligned with the NEM Build Pack document structure.
2. All corrected and upgraded documents are provided for code participant review with changes marked up.
3. The B2B Procedures documents and B2B Processes Participant Build Pack are new documents based on the corresponding NEMMCO B2B documents and used under licence from NEMMCO. These are provided for code participant review with WA differences marked up.
4. No change has been made to the B2B interface itself. This change request is documentation only.

## 2. Description of the proposed changes

The proposed changes are listed in the following table.

Item#	Document	Revision
00	Communication Rules	ERA request to approve document list corrections and combine Customer Transfer Code and Metering Code Communication Rules.
01	Usage Guidelines	Corrections, Define new and updated documents
02	Customer Transfer and Standing Data Procedure	New document
03	WA B2B Procedures: Meter Data Process	New document
04	WA B2B Procedures: Customer and Site Details Process	New document
05	WA B2B Procedures: Service Order Process	New document
06	WA B2B Procedures: Technical Guidelines	New document
07	WA B2B Procedures: Technical Delivery Specification	New document
08	WA B2B Processes Participant Build Pack	New document
09	Market Roles	New document
10	Web Portal User Guide (Metering Service Centre User Task Manual)	No change
11	Web Portal (Metering Service Centre) Functional Specification	No change
12	Infrastructure User Guide	Corrections, Upgraded
13	Market Defects	New document
14	List of Codes	Corrections, Upgraded
14.1	Key to Codes used in the Build Pack	Corrections, Upgraded
15	Glossary	Corrections, Upgraded
16	Process Description and Guidelines	Delete
17	System Interface Definitions	Delete
18	XSD	No change
19	XML Transaction Examples	Delete: samples are now embedded in the relevant documents
