

Circuit Breakers 2020

Roseworth Primary School

Our school

- We have
 - Around 300 students from PP to Year 6
 - A strong digital technology and STEM focus
- We are in the Northern suburbs of Perth, Girrawheen
- Our Circuit Breaker team consisted of 3 class from Year 4, Year 4/5 and Year 5

What we learnt about Western Power

- Western Power monitors the electrical network that supply power to the whole of WA.
- When a pole is damaged or the power supply is broken, Western Power is notified that it needs to be fixed.
 - This all happens in less than a second!
- Western Power have a lot of different types of jobs. They have:
 - Computer specialists
 - Engineers from many different fields
 - Electricians
 - Innovators

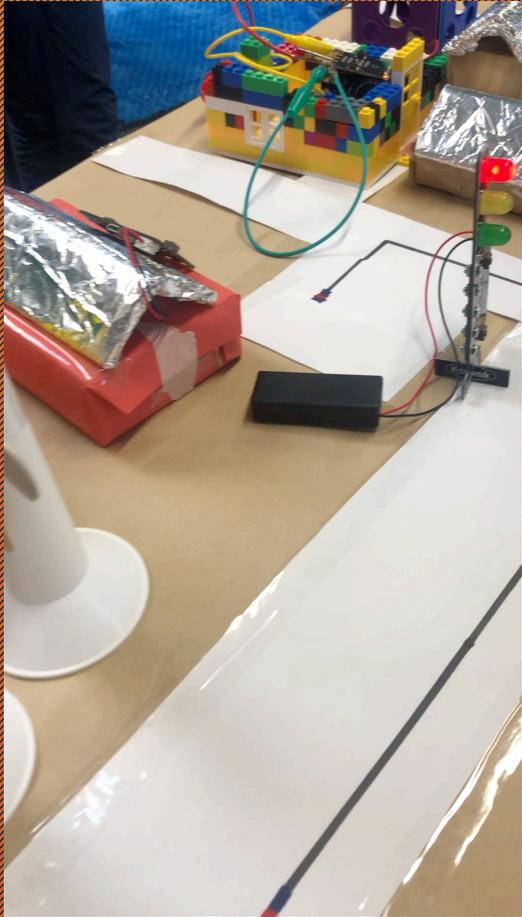

What we learnt about engineering...

- Engineers are PROBLEM SOLVERS
- Engineers look at how things work, how to improve and how to build: they are STEM Professionals
- Initially we thought STEM Professionals were builders and coders but that's not all they do...
 - They imagine
 - They discuss
 - They prototype
 - They reflect
 - They innovate
 - They discover new ways
 - They listen and work with others

W4s network of the future: micro:town, Roseville

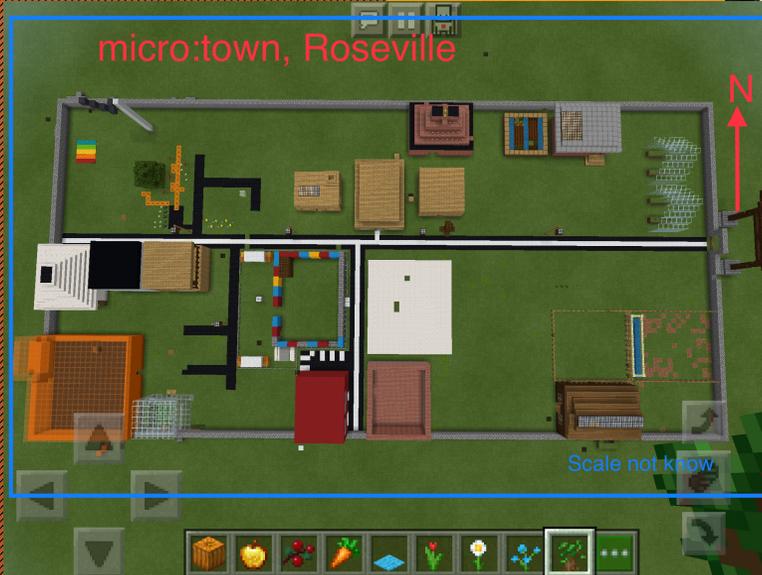

- micro:town is a place that is self sufficient and incorporates old world living with functioning farms (food and wind).
- We have a
 - Wind Farm
 - Green Houses
 - All amenities that a village needs
 - Western Power
 - And the usual; houses, hospitals, schools, traffic and street light

Welcome to W4s micro:town,
Roseville

Press *PLAY*
to walk
through the
town

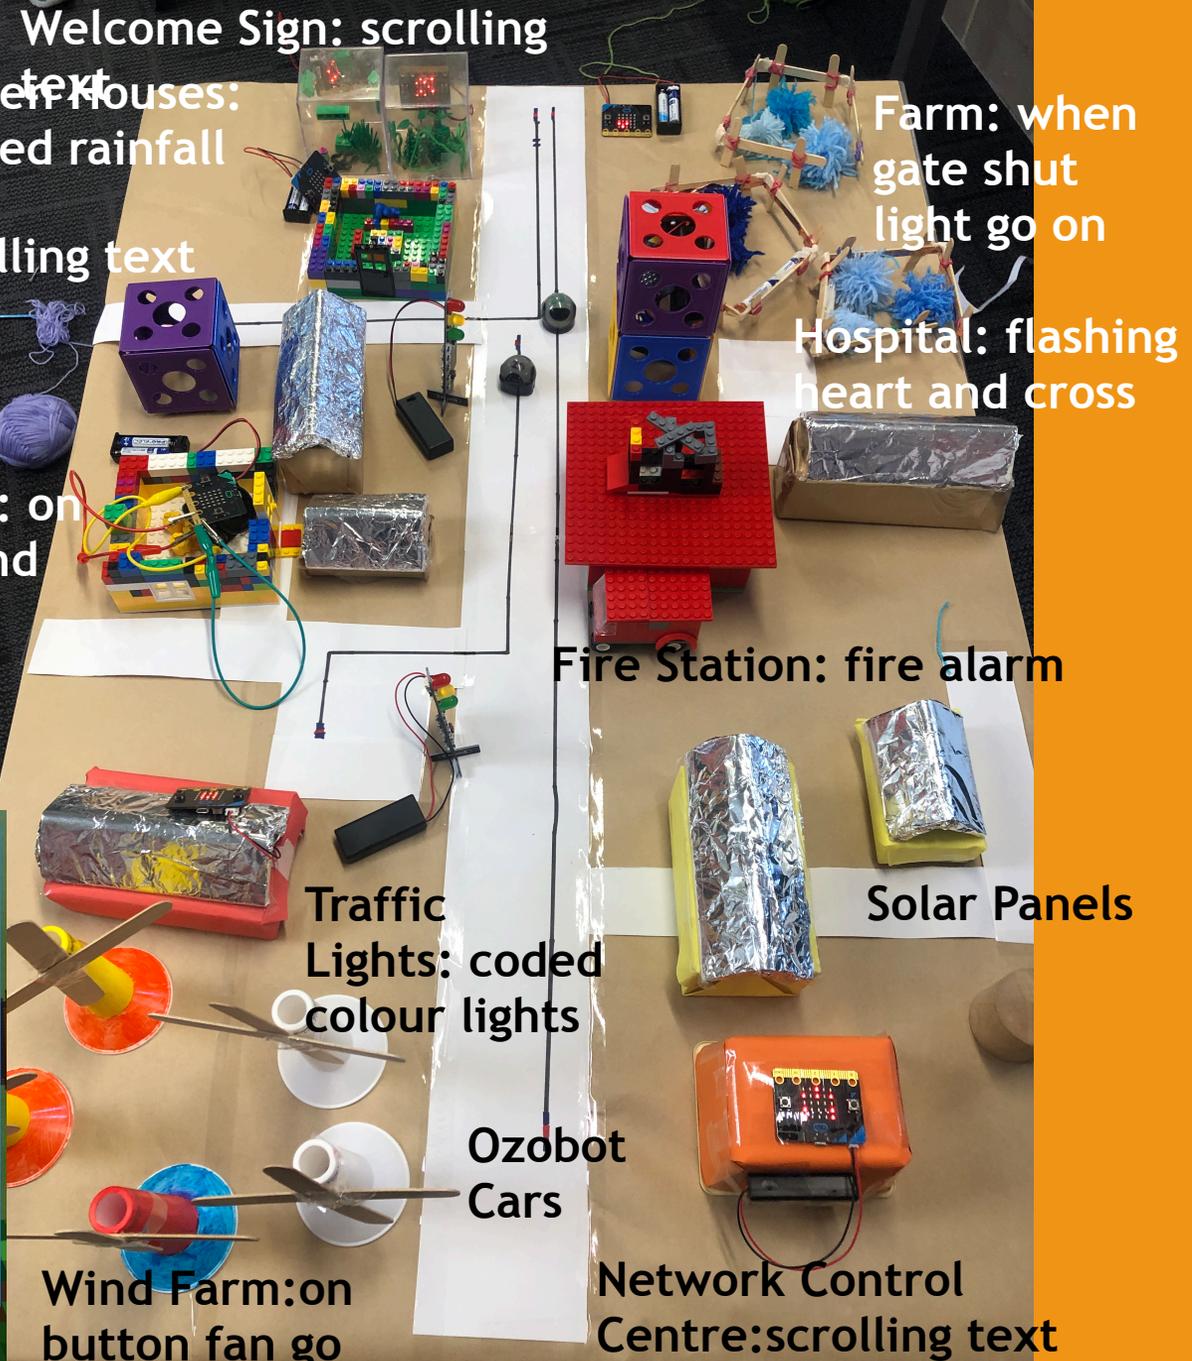

Minecraft Planning

Welcome Sign: scrolling
text
Green Houses:
coded rainfall

Shops: scrolling text

Doorbell Houses: on
button play sound

Farm: when
gate shut
light go on

Hospital: flashing
heart and cross

Fire Station: fire alarm

Solar Panels

Welcome to W3

Train : Lights and coded display of next train time

Houses: lights

Traffic lights: changing lights

Clock: coded chime

Park

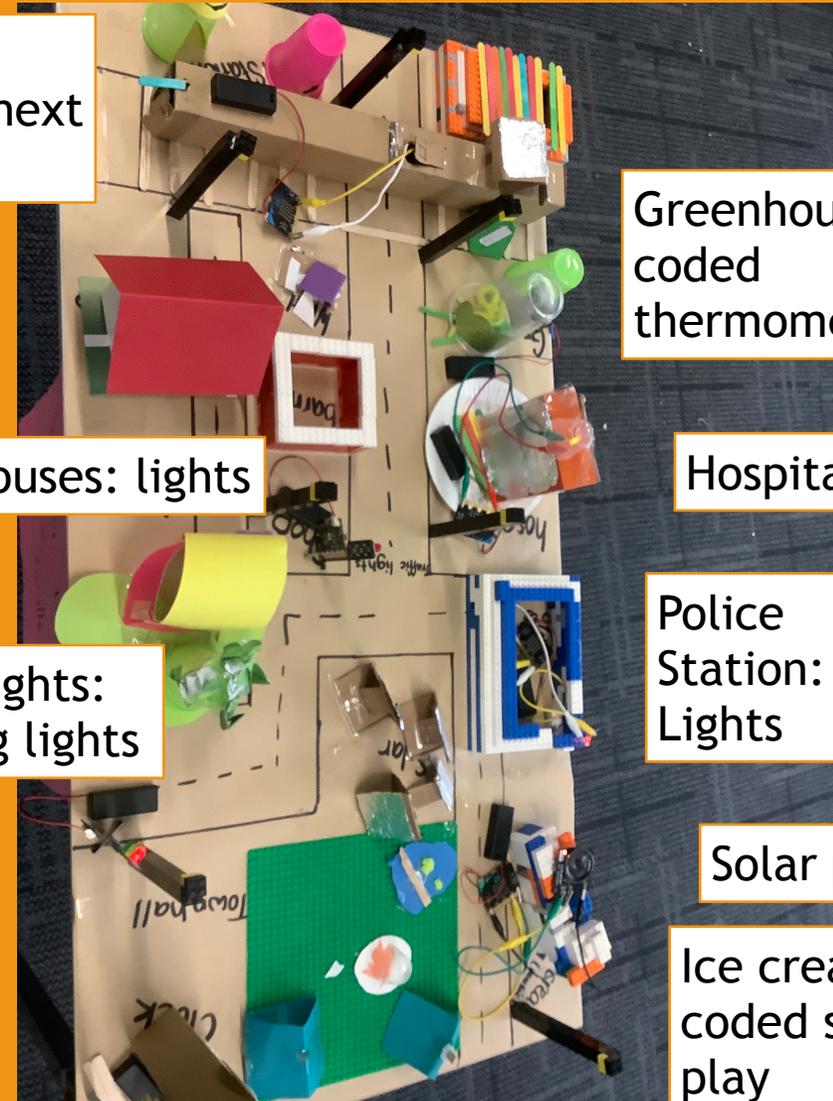

Greenhouse: coded thermometer

Hospital: lights

Police Station: Lights

Solar panels

Ice cream van: coded song to play

Our 5 favourite things about Circuit Breakers

1. Having fun while building our town
2. Being resilient and learning how to code
3. Using micro:bits spell words
4. Learning about Western Power and what they do for us
5. Being engineers and problem solving in different ways

Thank you...
